

3D Simulation Training/Virtual Reality

Improve product development and sales effectiveness with SCMEP's 3D Modeling and Virtual Reality services. Recent marketing research indicates that using true 3D models and virtual reality for sales and presentations boosts understanding and purchase intent by over 40%. And, by using 3D/VR for design reviews, manufacturing improvements, and employee training, companies can save thousands of dollars on costly mistakes and misunderstandings. SCMEP's recent applications of 3D/VR include: virtual facility prototyping, product design/prototyping, training, process visualization, life and safety, product configurations, and customer interface.
