

Project Management Made Easier

Everyone knows most projects are both late and over budget. Employees have too many projects and tasks. There are no clear priorities, and project schedules are unreliable. The good news is that three simple Lean Project Management tools could help you transform your project management performance.

In this 1-day workshop, participants will learn how to apply the three tools to their own unique situations in order to make an immediate improvement in workflow and success rates.

Recommended for small and medium sized manufacturers who manage projects for product development and/or operational improvements. Bring other coworkers to work together as a team for even greater effectiveness.
