

Strategic Maintenance Leadership

SCMEP is partnering with the Marshall Institute to bring you Strategic Maintenance Leadership! For over 35 years, Marshall Institute has provided world-class maintenance and asset management consulting and training services, led by experienced, knowledgeable consultants and training professionals that produce tangible, measurable, bottom line results.

Overview:

Strategic Maintenance Leadership is a progressive program designed for the modern entry-level supervisor or manager and the experienced manager who wants to enhance his or her capabilities in contemporary maintenance and leadership. Participants learn how to develop the right strategies and tactics for improvement, and how to marshal the right resources to make it happen.

The main objective of this course is to increase the effectiveness and efficiency of supervisors and managers of maintenance and reliability in order to increase the effectiveness and efficiency of the organization. Take a moment and ask yourself if you have to deal with these challenges:

- Do you have difficulty winning support for improvement efforts?
- Do you struggle to justify staffing-current levels or additions?
- Are you faced with shrinking maintenance budgets in the face of worsening equipment conditions?
- Have you been searching for the best way to energize your maintenance crafts?
- Are you new in a supervisory or management position and want to do a great job?
- Have you been looking for the right metrics to measure and display progress?
- Are you under the gun by management to improve efficiency and lower costs but unsure of how to approach the daunting task? Where to start? What to do?

If you are facing any of these issues, this is the course for you. Why? Our feedback indicates that many maintenance supervisors and managers do not have a thorough understanding of basic maintenance practices, but even worse, have far less knowledge of leadership practices. From this awareness, Strategic Maintenance Leadership was born to close that gap.
